#### **B&C PRO, 100 YEARS OF EXPERIENCE AT YOUR SERVICE**

Discover B&C PRO, developed by the European leader in the workwear industry. B&C PRO offers you a complete range of professional t-shirts, polo shirts, sweatshirts, bodywarmers and trousers. This collection combines the strength of the B&C brand, in terms of knit and outdoor products, with the cutting-edge experience of the European leader in the workwear industry.

#### STYLE, COMFORT, DURABILITY, EASY OF CARE

These 4 notions reflect the philosophy and concepts of the B&C PRO collection. Every product has been designed to guarantee style, comfort, durability and easy care, wherever you are, and is tailored to the world of work.

STYLE: Workwear should convey an image. Particular attention needs to be paid to the design of each garment [cut and colour] and how it can be personalised. This is why the products in our collection are garments that are perfectly suited for the up-to-date world.

COMFORT: Comfort is an important factor when it comes to productivity. Workwear should protect like a 'second skin', leaving room for nothing except concentrating on the job in hand. It therefore becomes an important factor in motivation and efficiency. This is why we carefully choose suitable fabrics and develop specific designs for each garment.

DURABILITY: to really guarantee productivity, workwear should combine quality and strength with comfort. Workwear is clothing that should last. High quality fabrics, triple stitched seams and specific linings are used for this very reason.

This is the approach applied by B&C PRO in developing and producing its workwear.

CARE: all our products are designed for intensive use. They must therefore be easy to care for. This is why garments from the B&C PRO collection are machine washable, retain their shape and can be tumble dried\*. What's more, they preserve their colour and appearance over time - wash after wash.

#### **B&C PRO JUST KEEP WORKING**

B&C PRO just keep working. [we care about the rest].

#### WE FOCUS ON THE PRODUCT, ALLOWING YOU TO CONCENTRATE ON YOUR WORK.

#### QUALITY AND TECHNOLOGY.

We have always made it a principle to supply the market with high quality garments, which are tested in accordance with the most exacting standards. Garments from the B&C PRO collection meet these same high standards, guaranteeing durable and versatile clothing; and all with style.

#### **B&C TROUSERS: YOUR IDEAL WORK PARTNER**

B&C PRO launches two new trousers to complete your work equipment. The B&C Universal PRO is a multi-purpose trouser suitable for all kinds of activities and the B&C Performance PRO is an added-value all-round trouser with additional large flying pockets and multiple Cordura<sup>®</sup> backings for increased longevity.

With the B&C PRO trousers, you can take on any position while working; they anticipate your movements. Strategic accessories are placed exactly where you need them. B&C PRO trousers are loaded with deep easy accessible pockets and with utilitarian loops and/or rings for carrying all those essentials whilst you're on the job. Comfort and durability are ensured by details that make the difference such as double and triple stitched seams, reinforced stress points and Cordura<sup>®</sup> layering, an elasticated back to adjust the belt, kneepads compatible legs or a wider hem at the bottom for leg length adjustment. B&C PRO trousers help you to perform with the quality assurance you deserve.

#### **CORDURA®**

Recognized for its long-lasting durability and resistance to abrasions, tears and scuffs, gram for gram Cordura<sup>®</sup> fabric is up to 10 times more durable than other fabrics. The tough Cordura<sup>®</sup> knee and hem reinforcement mean the B&C Performance PRO are going to last.

#### CORDURA

#### **KNEEPADS**

Knees are too important. Spare yourself to damage them, care for them! Use B&C PRO kneepads. Both B&C PRO trousers have adjustable pockets to insert those kneepads, with flap and Velcro<sup>®</sup> fastener, Oxford or Cordura<sup>®</sup> backing for extra comfort in the kneeling position. They simply make your life easier and your day more comfortable. They're light, tough and great value.

T-shirts from the B&C PRO collection combine design and skill with various details that are designed to make your work easier. The B&C Perfect PRO t-shirt, for example, has flat seams to avoid rubbing and retains its original shape, wash after wash, thanks to its Lycra® content. Finally, for more intensive work, our B&C CoolPower PRO Tee is a high performance COOL DRY T-shirt. It is made from breathable, antiperspirant, quick-drying fabric, which keeps you working throughout the entire day.

## STYLE - KNOW-HOW - ATTENTION TO DETAIL - INSULATION- COMFORT

B€€

Protection, durability, performance and temperature control are our key concerns when developing our jackets. The ergonomic, multi-pocketed design of the 2 B&C Softshell guarantees complete freedom of movement thanks to its articulated elbows and its 4-way stretch fabric. The B&C 3-in-1 offers you the versatility of a jacket combined with a removable fleece, allowing you to adapt whatever the weather. We produce 2 different bodywarmers: the B&C Bodywarmer+ and a PREMIUM version; the multi-pocketed, multi-purpose B&C Bodywarmer Explorer.

## COOL DRY

The B&C CoolPower PRO is made using 100% polyester yarn with a Cool Dry structure; which makes the garment extremely effective, even after a number of washes. This knit rapidly absorbs perspiration, transferring it to the outside of the garment and allowing you to feel fresh throughout the entire day. B&C has also used this high-performance technology for its B&C CoolPower PRO Tee (P. 18) t-shirt and its B&C CoolPower PRO Polo (P. 26) polo shirt.

### **COOL DRY TECHNOLOGY**

100% comfort for outstanding performance. Thanks to the special cross section of the polyester yarn, CDC technology offers 3 major benefits:

**ABSORPTION**: Because of their cross-shaped structure, the fibres offer greater air permeability

**IMMEDIATE TRANSFER**: This fibre creates a transfer system, which wicks moisture away from the surface of the skin, to the outside layer of the fabric.

**QUICK DRYING**: The structure dries this moisture and regulates your body temperature using a process of "cooling by evaporation".

## WASHING

Durability and washability are always important criteria. This is why B&C PRO garments can be machine or hand washed at 60°C - except for the B&C Expert Pro bodywarmer - and tumble dried.

## SOFTSHELL

#### 5.000 MM / 1.000 MVP

A high performance, top-quality fabric with advanced technology. The greatest attention right down to the minutest detail. The B&C Hooded Softshell uses state-of-the-art yarn, fibre and technology to guarantee maximum comfort in the most widely varying weather conditions. Thanks to its fabric and design, the B&C Hooded Softshell is a genuinely exciting addition to the clothing market for high quality jackets, as the quality of the product guarantees durability, performance and comfort, even in the harshest conditions. What's more, it comes with an adjustable hood, which guarantees complete freedom of movement and 100% peripheral vision.

## X-LITE SOFTSHELL TECHNOLOGY 8.000 MM / 5.000 MVP

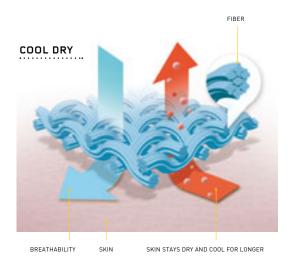

X-LITE SOFTSHELL 3-LAYER fabric consists of outer and inner fabric with a bounded membrane between them. The membrane blocks wind and whisks body moisture vapour away to the outer layer where it evaporates quickly regulating body temperature.

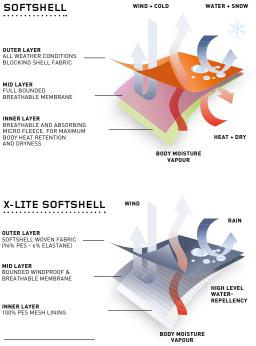

Highly waterproof, extremely breathable, windproof and with a high-level waterrepellency - here are the key features of this softshell jacket.

Light weight and stretched, this jacket is designed for a comfortable, dynamic and active use.

# **PST – PERFECT SWEAT TECHNOLOGY**

PST technology allows polyester to be used in an invisible way, thanks to the use of a 100% polyester filament. This filament is particularly effective in achieving outstanding wash-resistance.

LINK BETWEEN OUTSIDE AND INSIDE A CONTINUOUS THREAD POLYESTER FILAMENT FOR EXCELLENT STABILITY WHEN WASHED.

FABRIC

58 / GLOSSARY ////////

\_\_\_\_\_

## **CORDURA®**

CORDURA® Classic fabric provides rugged durable performance for a variety of end uses, including packs, luggage, footwear and performance apparel. Products made with CORDURA® Classic fabrics feature enhanced tear and abrasion resistance, and long -lasting durability. CORDURA® Classic fabric is constructed with qualifying yarns which are woven, dyed and finished in accordance with INVISTA's approved fabric standards for the CORDURA® brand.

## 144 FILAMENT MICRO FLEECE

144 filament micro fleece from B&C provides the warmth and comfort you need in any weather.

## WINDPROTEK

The warmth of 144 filament micro fleece fabric combined with a windproof / waterproof and breathable membrane makes an extra layer unnecessary.

## ETHICS AND THE ENVIRONMENT

#### **OEKO TEX**

B&C has always aimed to maintain high ethical production standards. All our garments comply with Oeko-Tex Standard 100, which guarantees that textiles and dyes are not harmful to health, both during production and for the people wearing our clothes.

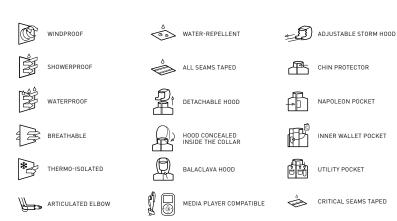

#### FAIRWEAR

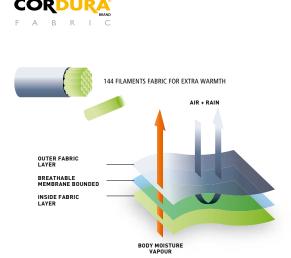

Moreover, in 2009, B&C signed the Fair Wear Foundation (FWF) charter; FWF is an organisation that fights for proper working conditions in the textile sector and which supervises around thirty or so international audits.

By becoming member of FWF, we committed ourselves to implementing and maintaining a Code of Conduct designed specifically for the garment industry. This Code of Conduct is based on the Conventions of the International Labour Organization and the Universal Declaration of Human Rights.

#### BSCI

B&C is a member of the BSCI (Business Social Compliance Initiative), a widely recognised platform in the business sector, which is working towards the application of ethical working conditions throughout the entire world. A code of conduct has been established by the organisation, and independent audit companies monitor its implementation in factories. www.bsci-eu.org
